

Asbestos Management Statement

Cocalico School District has conducted an independent inspection in accordance with the government's Asbestos Hazard Emergency Relief Act (AHERS) of 1986. This inspection was to determine the extent of asbestos-containing materials in our schools and to assess the potential for those materials to introduce respirable fibers into the air.

In accordance with the Asbestos Hazard Emergency Act, the Cocalico School District has conducted inspections of all the School District buildings for the presence of Asbestos Containing Building Materials (ACBM). An asbestos management plan for each building was developed detailing the location and condition of all ACBM along with the actions taken to protect building occupants. These management plans are available for review by any interested person in either the Cocalico Service Center or at the individual schools during normal working hours.

As of September 1997, all asbestos abatement was completed for the entire Cocalico School District according to our management plan prepared by EHC and Spotts, Stevens & McCoy. If you have any questions or concerns in reference to our Asbestos Management Plan please contact:

Kurt Eckenroad, Director of Buildings and Grounds Department
